Updates

1. NMR computer

▷ Cloned the uva-spin GitHub repositories

▷▷ `C:\uva-spin\e1039-target-controls`

▷▷ `C:\uva-spin\Temperature-Pressure-VIs`

▷▷ Will import all key changes from the local folders

▷ OS version = Windows 10 Home

▷▷ No official way of disabling the automated Windows update

▷▷ Do we have a Pro license?

2. Pressure sensor: MKS 615

▷ Manual: `https://manualzz.com/doc/4458938/`

▷ Absolute sensor with a built-in "zero" pressure reference (P_X w.r.t. P_R)

▷ 615 sensor head — 615 preamplifier (blue box) — 670 controller

▷ Found all parts, thanks to Dustin and Ernesto

▷ Will test this set at counting house first
